Network Certainty

APC USB Wi-Fi Device (AP9834)

Wireless communication accessory supporting the reliability, performance and security requirements of an IT infrastructure.

Ease of
Installation

Installation with APC Network Management Card 3 (AP9641, AP9643).

Replaces traditional wired network cabling requirements; enabling flexible, simple installation.
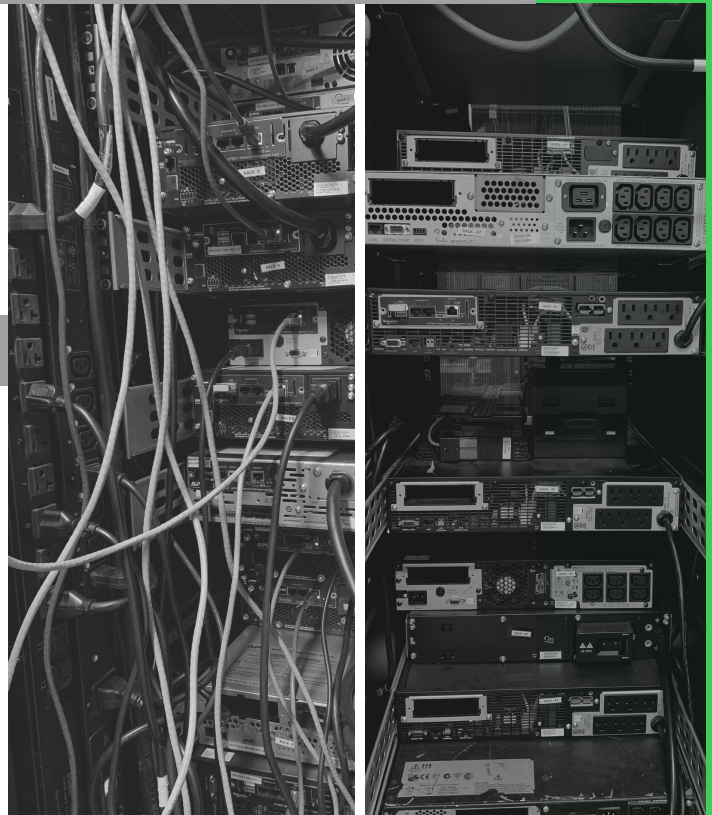

Maintenance

The removal of ethernet cords and cabling increases maintenance efficiency in less time and space; with clear view of any points of failure.

Wireless access reduces the total attack surface, ensuring a reliable, secure network.

Management

As your IT infrastructure grows and adapts, save on future maintenance costs.

Should your network change in the future, easily update the wireless network to meet new configurations.

Less Hardware, Reduced Clutter

Life Is On

Setup & Installation

3 Simple Steps

Insert the device into an available USB port

Enable and configure Wi-Fi via the NMC Web user interface

(Configuration> Network> Wi-Fi navigation path)
